DRAWINGS QUICKLY**

# KEYLINES

ROAD MARKING SOFTWARE

## CLIENT NEED

**TO CREATE COMPLIANT ROAD MARKINGS WHICH CONFORM TO LOCAL ROAD RULES AND HAVE FULL CONTROL OVER VISUAL STYLES**

“KeyLINES helped us draw a large volume of road markings from the M1 to the M62 with relative ease, considering we had never used it before. It is a powerful tool.”

Michael Shepherd  
Mott MacDonald

### CLIENT PROFILE

Mott MacDonald is a global engineering, management and development consultancy focused on guiding its clients through many of the planet's most intricate challenges.

Its engineers, project and program managers have taken lead roles in the world's highest profile infrastructure and development projects.

## SOLUTION

### KEYLINES FOR MOTT MACDONALD

KeyLINES helps Mott MacDonald create road marking and traffic management drawings quickly, allowing them to design complex road marking systems with ease.

It also assists in the production of 'green' sustainable strategies while analysing the safety factors and costs of their designs.

## KEYLINES

KeyLINES is road marking and traffic management design software incorporating a large library of road markings and symbols, which allows engineers to produce road layout drawings in AutoCAD. The 'grip' editing tool provides effortless re-working of designs, saving you time.

The markings in the KeyLINES library fully comply with the 2016 Traffic Signs Regulations and General Directions ensuring your designs are always up-to-date and compliant with the Standards.

It calculates costs and quantities as you go as well as producing a 3D driver's eye view for safety audits.

The latest version of KeyLINES offers a significant uplift in BIM functionality, particularly the ability to add your own custom fields and share data rich models with others using the BIM and IFC exports.
